ORGANIZATIONAL SOLUTIONS THAT WORK FOR YOUR BUSINESS

ConvergeITS provides full lifecycle infrastructure and architecture solutions, including: security infrastructure; information assurance; cyber offense/defense; and data center solutions. Our capabilities and credentials are second to none.

The ConvergeITS IA cyber security solutions are built upon in-depth understanding of information technology vulnerabilities, knowledge of cyber enemies and proven experience managing enterprise networks and systems. They include security infrastructure, information assurance, cyber offense and identity management offerings. ConvergeITS assesses vulnerabilities and determines optimal solutions; designs, implements and manages these solutions; and recommends upgrades to address dynamic cyber

threats and evolving customer needs.

ConvergeITS professionals assist the DoD and government organizations in navigating the maze of security regulations and certification and accreditation requirements, from FISMA to DIACAP. Our highly trained IA professionals recently assisted the Navy with their C&A accreditation of a large three-tiered data transport system in securing an authority to operate (ATO).
